Overview

A robust LPG bobtail truck designed for safe containment and efficient delivery.

Professional LPG Transport Solution

This LPG bobtail tank truck is engineered for the efficient and safe transportation and distribution of liquefied petroleum gas. Designed with versatility in mind, it features integrated pumping and loading/unloading systems that can be configured for side or rear operation. Built to comply with rigorous international safety codes, this vehicle is suitable for diverse applications across Europe, America, and Southeast Asia.

Technical Specifications

Schematic view of the tank truck design and layout.

Construction Materials

- SA-516
- SA-517
- SA-612
- P460
- Q420R
- Q370R

Vessel Capacity

5m³ ~ 40m³

Design Standards

ASME BPVC VIII-1, ASME BPVC VIII-2, EN 12493, GB/T19905, JB4732

Operational Features

Integrated pumping and dispensing equipment for reliable fuel transfer.

Pump Drive Options

PTO Driven • Hydraulic Oil • Electric Motor

System Configuration

Side or rear-mounted loading and unloading systems
