

LR20 Alkaline Battery Two-Pack

These LR20 alkaline batteries are designed for digital devices and toys. They provide a standard variable pressure of 1.5V.

Overview

High-Performance Alkaline Power

This LR20 alkaline battery two-pack is engineered for demanding digital devices and electronic gaming equipment. Designed to deliver consistent voltage and reliable power, these batteries feature a mercury-free and cadmium-free composition for safer usage. With optimized discharge characteristics, they provide a dependable energy solution for high-drain electronics.

Technical Specifications

Battery Type	LR20 (D Cell)
Nominal Voltage	1.5 V
Weight	130 g

Dimensions

Physical Dimensions

Dimension	Range (mm)
Diameter	32.3 - 34.2
Height	59.5 - 61.5

Usage & Features

Key Features

Mercury Free • Cadmium Free • High Current Output

Recommended Applications

Digital Devices, Video Games, High-Drain Electronics
