

LR521 Button Cell Battery

This is a button cell battery. It is commonly used in small electronic devices such as watches and calculators.

Product Overview

Compact Power Solution

The LR521 button cell battery is a reliable, non-rechargeable power source designed for small electronic devices. Its compact form factor makes it an ideal choice for precision instruments, including wristwatches, calculators, and various remote controls. Engineered for consistent performance, this cell provides the steady energy required for low-drain consumer electronics.

Technical Specifications

Battery Type

Button Cell • Non-Rechargeable

Model Number

LR521

Applications

Common Applications

- Wristwatches
- Calculators
- Remote Controls
- Small Electronic Devices
