Product Overview

Premium LR6 AA Alkaline Battery

These high-performance alkaline batteries are designed for demanding digital applications, offering reliable energy density and a long service life. With a chemistry focused on stability, they are mercury and cadmium-free, ensuring an environmentally conscious power solution. The durable construction makes them ideal for a wide variety of household and professional electronics.

Technical Specifications

Chemistry	Alkaline MnO ₂
Capacity (3.9ohm, 24h/d)	400 minutes
Shelf Life	10 years

Physical Dimensions

Height	50 mm
Diameter	14 mm

Compliance & Standards

Compliance Certifications	CE, ROHS
---------------------------	----------

Applications

Compatible Devices

- MP3 Players
- Walkmans
- Toys
- Remote Controls
- Flashlights

Logistics

Packaging Configuration

Pack Level	Quantity
Blister card	4
Inner box	48
Master carton	576
