

LTD624 LED Module for Emergency Lighting

The LTD624 LED module utilizes advanced LED technology for reliable emergency and security lighting. Designed for high-intensity illumination, it offers long-lasting performance in various operating conditions.

Overview

High-Performance Emergency Lighting

The LTD624 LED module is engineered for critical emergency and security lighting applications requiring high-intensity illumination. Designed for durability and efficiency, this module provides reliable performance in demanding environments, including emergency response systems and specialized vehicle setups. Its robust construction ensures consistent operation across various environmental conditions.

Technical Specifications

Design Features

High-Intensity • Long-Lasting • Robust Construction • Environmental Resistance

Primary Application	Emergency Lighting, Security Lighting, Vehicle Systems
Lighting Technology	Advanced LED
