Overview

High-Performance Luffing Jib Tower Crane

This luffing jib tower crane is engineered for high-capacity material handling, specifically optimized for urban construction environments and congested sites where space is limited. Featuring a robust tower structure and advanced control systems, it provides precise load placement and reliable vertical reach for high-rise building projects. The design prioritizes safety and efficiency, ensuring seamless operation in demanding construction conditions.

Models & Certification

Available Models

- LF3020
- LF4015
- LF5023

Certifications

CE, ISO 9001, TÜV SÜD

Operational Features

Key Operational Benefits

High-capacity lifting • Precise load control • Urban-optimized design • Advanced safety mechanisms
