

Luminescent Interphone and Pager Cords

These are luminescent cords designed for use with interphone and pager systems. The cords enhance visibility in low-light conditions and come in various colors.

Product Overview

High-Visibility Luminescent Cords

These specialized cords are designed for use in interphone and pager systems, featuring advanced luminescent properties for enhanced visibility in low-light environments. The cords are durable and flexible, ensuring reliable connectivity and ease of use in critical communication setups. Their glow-in-the-dark capability makes them an ideal solution for safety-critical or emergency response equipment where quick identification is essential.

Product Features

Key Features

- Luminescent material for high visibility
- Optimized for interphone and pager systems
- Flexible and durable construction
- Available in multiple color variations

Certifications & Standards

Safety-Compliant, Industrial Grade
