

Lyophilized Royal Jelly for Nutritional Supplement

This product contains lyophilized royal jelly, a substance produced by worker bees. It is packaged in sealed foil packets to maintain its nutritional properties.

Product Overview

Premium Nutritional Ingredient

Lyophilized royal jelly is a highly concentrated, nutrient-dense substance secreted by worker bees, essential for the development of queen bee larvae. Through the process of lyophilization (freeze-drying), the product retains its biological activity and nutritional profile while achieving a stable, shelf-ready form. It is widely used as a premium ingredient in health supplements and wellness formulations.
