Product Overview

Professional Vacuum Brazed Core Bits

These super premium brazed diamond dry drill bits are engineered for high-precision drilling in ceramic, porcelain, granite, marble, and stone. Utilizing advanced vacuum brazed technology, these bits offer superior durability and longer lifespans compared to standard electro-plated alternatives. Designed for both versatility and reliability, they feature a heat-treated carbon steel body that ensures consistent performance and minimal chipping during operation.

Technical Specifications

Product Length	64 mm
Connection Options	M14 Thread, 5/8"-11 Thread
Shank Type	Hex Shank

Performance Metrics

Expected Bit Life

30 holes

Holes per Bit

Compatible Materials

Ceramic Tiles • Porcelain Tiles • Granite • Marble • Stone

Construction

Design Features

- Vacuum brazed diamond technology
- Heat-treated thick carbon steel body
- Internal wax cooling
- Dry cutting capability
