Product Overview

Versatile Connection Solution

This M14 threaded to hex shank adapter is engineered to facilitate seamless connectivity between power tools and various abrasive accessories. Designed for durability and efficient power transfer, it allows for the quick attachment of core drill bits and diamond grinding wheels. It is an essential component for professionals seeking reliable performance in grinding and polishing applications.

Technical Specifications

Applications

Grinding • Polishing • Abrasive Work

Input Connection	M14 Threaded
Output Connection	Hex Shank
Compatible Accessories	Core Drill Bits, Diamond Grinding Wheels
