Product Overview

Professional Grade Weld Nuts

These M6 carbon steel weld nuts are precision-engineered for the furniture industry and various industrial applications. Available in both T-type and round head configurations, these fasteners are designed to provide a secure, permanent threaded connection on thin materials. Each production lot undergoes rigorous 100% quality inspection to ensure consistent performance and reliability for your manufacturing needs.

Technical Specifications

Thread Size	M6
Nominal Length	10 mm
Material	Carbon Steel
Finish	Plain
Nut Type Variations	T-Type Weld Nut, Round Head Weld Nut

Quality Assurance

Rigorous quality control measures ensure every nut meets precise dimensional and performance standards.

Standardized packaging process including inspection, weighing, and secure boxing for shipping.

Quality Control Protocol

- 100% production lot testing
- In-process manufacturing controls
- Final room inspection prior to packaging
