

# Macaron Selection Filling and Capping Machine

This automated machine selects, fills, and caps macarons. It features a vision system for quality control and ensures consistent filling and precise capping for high-volume production.

## ADDITIONAL IMAGES

## Product Overview

### Automated Macaron Assembly

This advanced machine streamlines the production of macarons by automating the selection, filling, and capping processes. Designed for high-volume manufacturing, it features an industrial vision system for precise alignment and synchronization. The system can operate as a standalone unit or integrate directly with existing continuous oven conveyor lines to minimize manual handling.

## Key Advantages

### Operational Benefits

- High-speed capacity via PLC Servo control
- Precision depositing for consistent filling
- Versatile configurations for various filling and capping types
- Seamless integration with oven conveyors
- Reduced labor costs and quick return on investment

## Technical Features

Control System	PLC Servo controlled
Automation Functions	Vision Selection, Alignment, Accumulation, Synchronization, Precision Depositing, Automated Capping

## Process Integration

### Integration

Standalone Operation • Oven Conveyor Connection • Freezing Tunnel Compatible • Wrapping Machine Compatible
