

Machinery Bearing Case with Metal Shaft

This bearing case is designed for machinery and industrial applications. It features a robust construction with a white housing and a metal shaft extending from both ends.

Product Overview

Industrial Machinery Bearing Case

This robust bearing case is engineered specifically for demanding industrial machinery applications. It features a durable white housing designed to provide reliable support and smooth operation for rotating components. With a dual-ended metal shaft configuration—including a squared end and a secure attachment hole—it ensures optimal performance, stability, and longevity in professional mechanical environments.

Physical Characteristics

Housing Color	White
Shaft Features	Metal Shaft, Dual-ended, Squared end, Attachment hole

Application

Primary Application

Industrial Machinery • Rotating Components
