

Machinery Clutch

This clutch mechanism is designed for XQB5-410 series machinery. It features a durable metal housing and pulley system.

Product Overview

High-Performance Machinery Clutch

This robust clutch mechanism is engineered for reliable power transmission in demanding industrial applications. Designed for seamless integration, the unit features a durable metal housing and a precision-engineered pulley system. It offers consistent performance for machinery requiring specific speed reduction and load handling capabilities.

Technical Specifications

Speed Reduction Scale	1:5
Wave Wheel Spline Size	1M×20R×11Z
Inner Gear Modulus	1

Operational Capacity

Suitable Clothes Weight

5 KG

Max Load
