

Machinery Moving Dollies

These heavy-duty machinery dollies are designed for safely and easily moving heavy equipment and machinery. They feature robust steel construction, swivel tops for maneuverability, and multiple rollers or wheels for smooth transport across various surfaces.

Product Overview

Industrial Machinery Moving Solutions

These heavy-duty machinery dollies are engineered to facilitate the effortless and safe transport of heavy industrial equipment. By utilizing advanced mechanical principles, these skates enable manual movement without the need for fuel or electrical power sources. The design includes 360-degree swiveling wheels, ensuring maximum flexibility and precise maneuverability in professional warehouse or manufacturing environments.

Technical Specifications

Rotation Range	360 degrees
Surface Protection	Yes

Operational Features

Mobility Characteristics

- Flexible movement
- Protective wheel design
- 360-degree swivel

Power Source	Manual, No Electricity Required, No Fuel Required
