

Machinery Moving Dolly with Rotating Platform

This load moving system is designed for ease of operation and maximum safety. It is suitable for professional load movers.

Product Overview

Professional Load Moving Solutions

These machinery moving dollies are engineered for professional load movers, providing total ease of operation and maximum safety when transporting heavy equipment. Featuring a steerable front section and adjustable rear trolleys, the system ensures precision even with loads ranging from 6 to over 200 tons. The low-profile design maintains a stable center of gravity, while the integrated rotating platform allows for effortless steering and positioning.

Performance Specifications

Load Capacity Range

6 T

Minimum Capacity

200 T

Maximum Capacity

System Components

- Steerable front section
- Pair of adjustable rear trolleys
- Rotating platform
- Heavy-duty handle

Key Features

Low profile, Easy maneuvering, Straight-line transport, Reduced manual effort
