

Machinery Moving Trolley

This heavy-duty machinery moving trolley is designed for transporting heavy loads. It features a robust steel frame and durable, low-friction rollers for smooth and efficient movement across various surfaces.

Overview

Heavy-Duty Machinery Transport

This machinery moving trolley is engineered for the efficient and safe transport of heavy industrial loads. Featuring a robust yellow steel frame and four durable, low-friction rollers, it ensures smooth movement across various surfaces. The design includes secure mounting points, providing stable attachment for reliable performance in demanding industrial environments.

Construction & Design

Frame Material	Steel
Frame Color	Yellow
Roller Type	Low-friction
Number of Rollers	4

Features

Application Environment	Industrial • Hoisting • Machinery Moving
Key Features	Heavy-duty, Low-friction rollers, Steel frame, Secure mounting points
