

Machinery Replacement Plug

This is a replacement plug for plastic machinery. It features a durable plastic housing and standard electrical prongs for easy connection.

Overview

Industrial Replacement Plug

This replacement plug is engineered specifically for plastic machinery applications, ensuring reliable power transmission in demanding industrial environments. Featuring a high-visibility orange housing and standard electrical prongs, it is designed for straightforward installation and durable performance. This component serves as an essential maintenance item for sustaining operational uptime.

Technical Specifications

Key Features

- Durable plastic housing
- Standard electrical prongs
- High-visibility design
- Industrial-grade reliability

Housing Color	Orange
Model Marking	TS-K
Application	Plastic Machinery, Industrial Equipment, Electrical Maintenance
