

# Machinery Skates for Heavy Equipment Transport

Machinery skates are designed for moving heavy equipment and machinery. Featuring a robust construction with multiple rollers, they ensure smooth and efficient movement.

## Product Overview

### Heavy-Duty Machinery Transport Solutions

These professional-grade machinery skates are engineered for the safe and efficient movement of heavy equipment and industrial loads. Designed specifically for straight-line transport, they are ideal for large-scale projects, bridge installations, and facility relocation tasks. With a robust construction and high-capacity performance, these roller skids provide a reliable solution for demanding industrial environments.

## Technical Specifications

### Load Capacity Range

<b>3 tons</b> Minimum Capacity	<b>1000 tons</b> Maximum Capacity
-----------------------------------	--------------------------------------

### Movement Capability

Straight-line movement

## Certifications & Compliance

### Quality Standards

CE, GS, ISO 9001

## Service & Manufacturing

### Service Availability

- OEM Service
- ODM Service
