

Machinery Skates with Rotating Top

These machinery skates are designed for moving heavy equipment. Their special requirements can be customized based on capacity or shape.

Overview

Versatile Machinery Skates

These machinery skates are designed for the efficient transport of heavy equipment and machinery in industrial settings. Featuring a rotating top pad, they allow for precise steering and positioning during relocation or installation tasks. Built with durable, non-floor damaging rollers, these skates ensure smooth movement while protecting your facility's flooring.

Key Features

Movement Capabilities	Rotating Top Pad, Straight Movement, Swivel Direction
Floor Protection	Yes
