Product Overview

High-Durability Machinery Starter Reel

This starter reel is a precision-engineered component designed for reliable engine starting and winding operations in small machinery. Constructed from high-strength industrial plastic, the unit features a reinforced rim and a stable central mounting hub to ensure longevity under mechanical stress. It is a versatile spare part compatible with a wide range of water pumps, generators, and chainsaws.

Technical Details

Material	Durable Industrial Plastic
Design Features	Reinforced Ribbed Rim, Central Mounting Hub, Radial Support Structures

Compatibility

Common Applications

- Small Generators
- Water Pumps
- Chainsaws

Compatible Engine Types

HONDA • YAMAHA • ROBIN • STIHL • KAMA • KIPOR • YANMAR
