

Machinist Hammer with Dual-Material Handle

This machinist's hammer features a hardened steel head, ideal for striking metal and shaping materials. The dual-material handle combines a durable core with a black overmold for enhanced grip and comfortable use.

Product Overview

Professional Machinist's Hammer

This machinist's hammer is engineered for precision metalworking tasks, including striking metal and shaping workpieces. It features a hardened steel head designed for durability and impact resistance. The dual-material handle combines a rigid core with a comfortable overmold grip, ensuring safe and effective handling during intensive workshop use.

Technical Specifications

Handle Colors

Orange • Black

Head Material

Hardened Steel

Handle Construction

Dual-material, Overmold grip, Impact-resistant core

Usage & Application

Primary Applications

- Metalworking
- Workpiece shaping
- General striking tasks
