

Magic Tape Auto-Feed Sewing Machine

This is an automatic feeding sewing machine designed for magic tape applications. The machine features a precise feeding mechanism to ensure consistent tape placement, enhancing efficiency and accuracy in sewing processes.

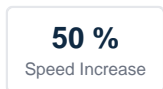

Overview

High-Efficiency Velcro Sewing Solution

The Magic Tape Auto-Feed Sewing Machine is engineered to streamline the application of velcro across a wide range of textile products including clothing, footwear, bags, and accessories. By integrating advanced microcomputer programming with automatic cutting and transport systems, this equipment delivers a 50% increase in sewing speed compared to traditional methods. Designed for high-volume production, it combines mechanical, electrical, and pneumatic systems to ensure stable, low-noise, and pollution-free operation.

Performance & Efficiency

Efficiency Improvement

Key Operational Features

- Microcomputer-controlled programming
- Automatic tape cutting system
- Integrated automatic transporter
- Combined mechanical, electrical, and pneumatic operation

Applications

Compatible Applications

Clothing, Umbrellas, Bags, Shoes, Hats, Toys

Environmental & Operational

Operational Characteristics

Low Noise • Stable Performance • No Pollution • Labor Cost Reduction
