

Magnetic Drill Press

This magnetic drill press is designed for heavy-duty drilling applications. Its robust construction and high-torque motor allow for efficient and precise drilling in steel and other ferrous materials.

Overview

Heavy-Duty Magnetic Drilling Solution

This magnetic drill press is engineered for heavy-duty drilling applications, offering a robust construction suitable for professional fabrication and construction environments. Equipped with a high-torque motor, it ensures efficient and precise performance when working with steel and other ferrous materials. The integrated magnetic base provides a secure, reliable hold, facilitating accurate drilling across various operational positions.

Key Metrics

Performance Highlights

32 mm

Max Drilling Capacity

Application Features

Best Suited For

Construction, Metal Fabrication, Maintenance Tasks, Steel Drilling

Technical Specifications

Core Features

- High-torque motor for efficient operation
- Secure magnetic base for multi-position drilling
- Robust build quality for heavy-duty use
- Optimized for ferrous materials
