

Magnetic Drill Press

This magnetic drill press is designed for precision drilling on metal surfaces. Its powerful motor and magnetic base ensure stability and accuracy, while variable speed control adapts to different materials and drilling diameters.

Overview

High-Performance Magnetic Drill Press

This industrial-grade magnetic drill press is engineered for precision and heavy-duty performance on metal surfaces. Featuring a powerful 2980W motor and robust magnetic adhesion, it delivers exceptional stability for demanding drilling, tapping, and reaming tasks. Its versatile variable speed settings and high drilling capacity make it an essential tool for construction, fabrication, and maintenance professionals.

Performance Metrics

Drilling Capacity

130 mm

Max Core Drill

32 mm

Max Twist Drill

24 M

Max Tapping

Magnetic Adhesion

20800 N

Technical Specifications

Power Requirements

- 2980W Power Output
- 110/220/230/240V Voltage
- 50-60Hz Frequency

Operational Dimensions

Parameter	Value	Unit
Stroke	300	mm
Cutting Depth	100	mm

No-load Speed Ranges

40-110 RPM, 65-180 RPM, 190-510 RPM, 300-800 RPM

Logistics

Shipping Specifications

- Packing Size: 75 x 20 x 47 cm
- Gross Weight: 31 kg
- Net Weight: 23.5 kg
