

Magnetic Lifter for Steel Plates 1000kgf Capacity

This magnetic lifter is designed for lifting steel plates and other ferromagnetic materials. It has a lifting capacity of 1000 kgf and is suitable for use in a temperature range of -40°C to 80°C.

Product Overview

Professional Magnetic Lifting Solution

This high-capacity magnetic lifter is engineered for the efficient handling of steel plates and various ferromagnetic materials. Designed for industrial reliability, it features a robust manual operation system with an ergonomic handle for safe and precise control. Built to withstand demanding environments, it maintains performance across a wide temperature range.

Technical Specifications

Max Lifting Capacity

1000 kgf
Capacity

Operating Temperature Range	-40°C to 80°C
Operation Method	Manual
Compatible Materials	Steel Plates, Ferromagnetic Materials
