

# Magnetic Media Degausser

This degausser efficiently destroys data on hard drives, floppy disks, tapes, and other magnetic media. It is designed for small offices needing to securely erase sensitive information.

## Product Overview

### Secure Data Destruction

The XBC-02 degaussing machine provides a professional-grade solution for the secure and permanent destruction of information stored on magnetic media. Designed for small to medium office environments, this equipment ensures that sensitive data is rendered completely unrecoverable, helping organizations maintain regulatory compliance. It features advanced monitoring capabilities including voltage detection and magnetic field strength sensing to guarantee operational effectiveness.

## Technical Capabilities

### Compliance and Standards

State Secrecy Bureau Certified

### Compatible Media

Hard Drives, Floppy Disks, Magnetic Tapes

## Features

### Advanced Functionality

- Integrated voltage monitoring
- Magnetic field strength detection
- Computer management connectivity
- Automated destruction cycle
