

Magnetic Mount GPS Antenna

This GPS antenna is equipped with a magnetic mount, facilitating easy attachment to vehicles or metallic surfaces. It ensures dependable GPS signal reception for use with GPS receivers and navigation systems.

Overview

High-Performance GPS Antenna

This Magnetic Mount GPS Antenna is engineered for reliable signal reception across various navigation and tracking applications. Featuring a robust magnetic base, it allows for quick and secure installation on metallic surfaces, making it ideal for vehicle fleets and mobile equipment. Its versatile design ensures optimal performance and durability, providing a stable connection for GPS receivers and navigation systems in diverse environmental conditions.

Technical Specifications

Installation Features

- Magnetic base for metallic surfaces
- Extended cable length for flexible placement
- Durable construction for environmental resistance

Mounting Type	Magnetic
Compatible Systems	GPS Receivers, Navigation Systems, Tracking Devices
