

# Magnetic Plate Lifter

This permanent magnetic lifter is designed for lifting steel plates and blocks. It features a handle for manual operation, enabling easy attachment and detachment from the workpiece.

## Overview

### Professional Magnetic Lifting Solution

This permanent magnetic lifter is engineered for the efficient handling of steel plates and blocks in demanding industrial environments. Featuring a robust yellow body and an ergonomic manual handle, it allows for seamless attachment and detachment from workpieces. Its durable construction makes it a reliable tool for various lifting applications in manufacturing and construction sectors.

## Performance Metrics

### Rated Lifting Capacity

**300 kgf**

Max Lifting Force

## Technical Specifications

Model Identifier	PML-300
Operating Temperature Range	-45 to +80°C
Design Features	Permanent Magnet, Manual Operation, Industrial Grade, Steel Plate Compatible
