Product Overview

Versatile Magnetic Construction

This magnetic sphere construction set offers a highly engaging manipulative tool suitable for both recreational and educational applications. Crafted from powerful metal magnets, the spheres allow for seamless connection and the creation of intricate geometric shapes and patterns. Designed for creativity, stress relief, and scientific demonstration, this set provides a sleek and modern aesthetic for any workspace or classroom.

Technical Specifications

Magnetic Strength

High Attraction • Powerful

Material Composition

Neodymium Metal

Surface Finish

Silver Metallic

Applications

Primary Applications

- Creative Construction
- Stress Relief
- Educational Demonstrations
- Scientific Experiments

Performance Highlights

1 Neodymium

Magnetic Material Type
