

Magnetic Starter for Motor Control

This magnetic starter is designed for industrial machinery applications. It provides overload protection and is suitable for controlling electric motors.

Overview

Industrial Motor Control Solution

This magnetic starter is engineered for reliable motor control in demanding industrial environments. It features a robust, durable enclosure designed to withstand harsh operating conditions, ensuring long-term performance. Equipped with intuitive, color-coded start and stop pushbuttons, it offers straightforward operation for machinery control while providing essential overload protection for connected electric motors.

Technical Specifications

Control Type	Magnetic Starter
Protection Features	Overload Protection, Motor Control

Design & Interface

Interface Controls

- Start Button (Green)
- Stop Button (Red)

Enclosure Build

Industrial Grade • Durable
