

Magnetic Welding Positioner

This magnetic welding positioner is designed to hold ferrous metal workpieces securely at various angles, including 45°, 90°, and 135°, for welding, soldering, or assembly. Constructed from heavy-duty steel with strong internal magnets, it provides reliable and accurate positioning, increasing efficiency and safety.

Product Overview

Professional Magnetic Welding Positioners

These magnetic welding holders are engineered to securely hold ferrous metal workpieces at precise angles, including 45°, 90°, and 135°. Constructed from heavy-duty steel with high-strength internal magnets, they facilitate hands-free operation for welding, soldering, and assembly tasks. The integrated central hole design ensures easy handling and precise alignment, making these tools essential for increasing efficiency and safety in professional welding environments.

Technical Specifications

Available Weight Capacities

- 25 lbs
- 50 lbs
- 75 lbs

Material Compatibility

Ferrous Metals

Key Features

- Central hole for easy handling
- Hands-free operation
- High-strength internal magnets

Supported Angles

45°, 90°, 135°

Construction Material

Heavy-duty steel
