Product Overview

Comprehensive Maize Processing Solution

This complete maize flour milling system is designed for efficient, high-volume production of maize flour, grits, and bran. It integrates the entire processing workflow, including cleaning, degermination, milling, and packaging, into a single, robust industrial line. Engineered for durability and hygiene, the system features stainless steel components and adjustable milling parameters to ensure consistent, high-quality output tailored to specific production requirements.

Capabilities

Processing Stages

- Cleaning
- Degermination
- Milling
- Packaging

Output Products

Maize Flour, Maize Grits, Maize Bran

Technical Features

Key Components

- Roller Mills
- Sifters
- Purifiers
- Hoppers
- Conveyors

Operational Features

Adjustable Milling Parameters • Integrated Dust Control • Stainless Steel Construction • Automatic Packing

Service & Support

Service & Warranty

| Service Type | Details |
|------------------|--------------------------------|
| Warranty Period | 1 Year |
| Spare Parts | 1 Year Free |
| Support | Lifelong Service |
| Turnkey Services | Design, Installation, Training |
