Overview

Complete Maize Milling Solution

This industrial-grade maize flour production line offers a comprehensive, turnkey solution for high-capacity flour manufacturing. The system integrates advanced stages including cleaning, conditioning, degermination, milling, and sifting to ensure optimal particle size and consistent flour quality. Designed for reliability and efficiency, the automated process minimizes manual intervention while maximizing throughput for commercial food processing applications.

Technical Specifications

Processing Stages

- Cleaning
- Conditioning
- Degermination
- Milling
- Sieving
- Packaging

Key Features

Automated Operation, Turnkey Project, High Throughput, Industrial Grade, Steel Construction

Service & Support

Warranty & Support

Service Type	Details
Quality Guarantee	1 Year
Spare Parts	1 Year Free
Ongoing Support	Lifelong Service
Project Scope	Design, Installation, Commissioning, Training
