

Malleable Iron Bottom Cap for Line Post Insulators

Malleable iron bottom caps provide a robust connection point for line post insulators. They offer excellent mechanical strength and corrosion resistance for stable mounting in demanding environments.

Product Overview

High-Performance Insulator Component

This malleable iron bottom cap is engineered specifically for use with line post insulators in high-voltage power applications. Constructed from durable ductile iron and finished with hot-dip galvanization, it provides exceptional mechanical strength and long-term corrosion resistance. Designed for demanding electrical infrastructure, this component ensures a robust and secure connection point for reliable insulator mounting.

Technical Specifications

Tensile Strength

100 KN

Tensile Strength

Surface Treatment

Hot Dip Galvanized

Material

Malleable / Ductile Iron

Model Type

JZ-03

Color

Silver

Application & Usage

Primary Application

Line Post Insulators, High Voltage Insulators

Logistics & Terms

Payment Terms

- 30% T/T in advance
- 70% after Bill of Lading (B/L) verification
- L/C
- Credit Card
- Western Union

Packaging

Export fumigation-free wooden case lined with plastic film (customizable per buyer requirement)

Shipping Methods

Air, Boat, Truck, TNT, DHL
