Product Overview

High-Performance Malleable Iron Fittings

These malleable iron pipe fittings are engineered for durability and reliability in demanding industrial and plumbing environments. Designed to provide high strength and excellent resistance to corrosion, they are ideal for secure connections in water, gas, and air line systems. With a versatile range of sizes and adherence to international standards, these fittings ensure leak-proof joints for complex piping networks.

Technical Standards

International Standards	ANSI B16.3, DIN 2950, ISO 49
Material Standards	ASTM A197, DIN 1692, ISO 5922
Thread Standards	ANSI B20.1, DIN 2999, ISO 7/1

Dimensions & Compatibility

Available Size Range	1/8 inch to 6 inches
