

# Malleable Iron Wire Rope Clip

This malleable wire rope clip is designed for securing wire rope ends. It is constructed from malleable iron, ensuring durability and resistance to deformation.

## Product Overview

### Reliable Wire Rope Termination

This malleable iron wire rope clip is engineered to provide a secure and robust connection for wire rope terminations. Featuring a classic U-bolt design with a saddle and two tightening nuts, it ensures reliable performance and resistance to deformation under load. It is an essential component for various industrial applications requiring dependable wire rope securing.

## Technical Details

### Compliance

Industry Standard Compliant

### Suitable Applications

- Securing wire rope ends
- General wire rope terminations
- Industrial rigging connections

### Material

Malleable Iron

### Design Features

U-bolt design, Saddle included, Dual-nut tightening
