

Manual Bow Saw for Garden Use

This manual cutting tool is designed for pruning branches and cutting small trees. It features a tubular steel frame with a tensioning mechanism to hold the blade securely.

Product Overview

Manual Bow Saw for Garden Use

This manual bow saw is a versatile cutting tool specifically engineered for efficient garden maintenance, including pruning branches and trimming small trees. It features a robust tubular steel frame with a precise tensioning mechanism to ensure the blade remains secure during operation. The blade utilizes double-side grinding teeth that have been hardened by high-frequency current, offering superior cutting performance and durability for outdoor tasks.
