

Manual Bypass Pruning Shears Set

This set includes manual pruning shears with bypass blades for gardening and landscaping. The shears are designed for trimming branches, stems, and foliage in gardens and orchards.

Product Overview

Professional Manual Pruning Set

This versatile set includes three distinct models of manual bypass pruning shears, engineered for precision gardening and landscaping tasks. Featuring durable all-metal construction and high-visibility orange finishes, these tools are designed to handle branches, stems, and foliage in both gardens and orchards. With options ranging from ergonomic curved handles to rubberized grips, this collection provides the control and comfort required for professional maintenance work.
