

Manual Cable Puller Winch

This manual cable puller winch is designed for lifting and pulling heavy loads. It features a ratchet mechanism for efficient operation and a comfortable handle for ease of use.

Overview

Professional Manual Cable Puller

This manual cable puller winch is a versatile tool designed for high-altitude work and temporary anchoring applications. It features a lightweight yet durable aluminum frame combined with high-quality galvanized wire rope for reliable performance in demanding environments. The integrated ratchet and pawl system ensures precise control and safety during lifting and pulling operations.

Key Features

Construction & Design

- Lightweight aluminum frame for portability
- Alloy steel load hook with safety latches
- Galvanized high-quality wire rope
- Reliable ratchet and pawl system

Technical Specifications

Available Models & Capacities
