

Manual Cable Tie Tensioning and Cutting Tool

These manual tools are designed for tensioning and cutting cable ties. They are suitable for securing cable ties of various widths and feature an automatic cut-off mechanism.

Product Overview

Professional Cable Tie Management

These manual cable tie tools are designed for efficient tensioning, securing, and cutting of nylon cable ties. Featuring ergonomic, durable construction, they are ideal for bundling wires, cables, and other applications requiring precision. With automatic cut-off mechanisms and adjustable tension settings on select models, these tools ensure consistent performance and professional results in demanding environments.

Technical Specifications

Model Comparison

Model	Tie Width Capacity	Length	Weight
HS-600A	2.4 - 4.8mm	160	0.3
TG-100	2.4 - 4.8mm	145	0.47
TCA-203	2.4 - 12mm	165	0.3
HS-519	2.4 - 9.0mm	195	0.26

Compatible Tie Lengths

50 mm

Minimum Length

500 mm

Maximum Length

Features

Key Capabilities

Automatic Cut-off, Adjustable Tension, Ergonomic Design, Durable Nylon Construction, Wire Bundling

Usage Instructions

How to Use

- Fasten the cable using the cable tie.
- Adjust the pulling tension on the tool as required.
- Insert the end of the cable tie into the tool.
- Press the trigger to fasten and automatically cut the excess tie.
