

Manual Caulking Dispenser Gun

This caulking gun is designed for dispensing materials from a cartridge or tube. It is used for sealing gaps, cracks, and joints in construction and renovation projects.

Product Overview

Professional Manual Dispensing Tool

This manual caulking dispenser gun is a reliable tool designed for the precise application of sealants, adhesives, and caulks. Engineered for durability, it features a robust cold-rolled steel construction with a powder-coated finish for enhanced resistance to wear and corrosion. It is an essential implement for construction, renovation, and maintenance projects requiring consistent material flow.

Construction & Materials

Body Material	Cold rolled steel
Finish	Powder coating

Usage

Primary Industries

Construction • Renovation • DIY Projects

Suitable Applications	Sealant, Adhesive, Caulk
