Product Overview

Versatile Manual Lifting Solution

The HSZ Type chain block is a robust, portable manual hoist designed for heavy-duty industrial applications. Engineered for reliability in environments without power sources, it is ideal for construction sites, warehouses, and maintenance facilities. Its compact design and high mechanical efficiency ensure safe and efficient lifting, loading, and machinery installation.

Technical Specifications

Lifting Capacity

2 TON

Rated Capacity

Certifications

CE

Operational Features

Recommended Environments

- Factories
- Mines
- Agriculture
- Construction sites
- Docks
- Warehouses

Key Operational Benefits

Portable, No Power Required, High Mechanical Efficiency, Easy Maintenance

Design & Construction

Safety Mechanisms

- Safety latch on hooks
- Secure load grip

Build Quality

Robust steel construction with high-strength alloy steel chain
