Overview

Robust Manual Chain Hoist

This manual chain hoist is designed for reliable and flexible lifting in industrial and construction environments. It features a thickened steel shell with a convex rib design for impact resistance and a multi-point support structure for stable operation. With safety-focused engineering including double-pawl braking and non-slip nuts, it provides a secure solution for heavy-duty lifting tasks.

Certifications & Standards

Certifications

CE, GS

Technical Specifications

Available Capacities

- 0.5 Ton
- 1 Ton
- 2 Ton
- 3 Ton
- 5 Ton
- 10 Ton

Safety Features

Double Pawl Braking • Non-slip Nuts • Overload Device (Optional)

Construction

Shell Construction

Thickened steel shell with convex rib process

Bearing System

Yes
