Product Overview

Precision Manual Coffee Grinder

This manual coffee grinder features a high-hardness 420 stainless steel burr and a precision CNC-machined five-core conical burr design, ensuring consistent grinding for various brewing methods. Engineered with a unique anti-skip diamond pattern and magnetic ball handle, it offers a smooth, labor-saving grinding experience. The 12-point dial selector allows for versatile grind settings, ranging from fine Turkish coffee to coarse French press.

Technical Specifications
