Overview

Heavy-Duty Cargo Protection

This manual crank tarp system is engineered for dump trailers and commercial vehicles, providing robust protection against debris and weather elements during transport. The kit features a durable mesh tarp assembly and an adjustable tension bar system to ensure secure coverage for various loads. Designed for long-lasting performance and reliability, it offers a practical solution for maintaining cargo integrity on the road.

Technical Specifications

Model Numbers

- 1000 (Crank Tarp Kit)
- 1010 (Tension Bar)

Key Features

Manual Crank Operation, Adjustable Tension, Heavy-Duty Construction, Weather Resistant

Application

Primary Application

Dump trailers, commercial trucks, and heavy-duty transport vehicles.
