Product Overview

Professional Manual Drain Cleaning Solution

This manual drain cleaner is engineered for efficiency, featuring a high-tensile carbon steel cable that balances rigidity with the flexibility needed to navigate complex pipe bends. The ergonomic resin grip ensures a comfortable and secure hold during operation, making it ideal for clearing obstructions in various residential and commercial plumbing systems. Designed with a specialized hook head, it effectively snags and removes debris to restore full flow to blocked pipes.

Technical Specifications

Available Size Configurations

Cable Diameter	Wire Thickness	Total Length
6mm	1.3mm	3m
9mm	1.8mm	5m

Material & Build

Cable Material

Rigid Carbon Spring Steel

Handle Material

High-Resistance Resin (PP)

Key Design Features
