

# Manual Garden Bow Saw for Pruning

This garden bow saw is a manual cutting tool ideal for pruning branches. It features a durable steel or aluminum frame and a high-carbon steel blade.

## Product Overview

### Professional Pruning Bow Saw

This manual garden bow saw is engineered for efficient pruning and cutting of branches in landscaping and horticultural applications. Featuring a robust tube frame construction, it offers the stability required for demanding outdoor tasks. The blade is precision-engineered with double-sided grinding teeth that have been hardened via high-frequency current for superior durability and cutting performance.

## Technical Specifications

Tube Dimensions	14 x 28 x 1.2 mm
Blade Characteristics	Double-side grinding, High-frequency hardened teeth

## Certifications

Quality Standards  
ISO 9001:2008
