

Manual Hammer Tool

This is a manual hand tool designed for striking surfaces. It features a head, typically made of hardened steel, attached to a handle.

Overview

Professional Manual Hammer

This manual hand tool is engineered for precision striking and impact-related tasks. Featuring a durable head constructed from hardened steel, it provides the necessary force for driving nails, shaping metal, and breaking objects. Designed for reliability and longevity, this tool is an essential addition to any professional workshop or toolkit.
