

Manual Hand Pull Oil Fluid Transfer Pump

This manually operated pump is engineered for transferring fluids using a hand-pull mechanism. It is suitable for dispensing oil, lubricants, and other non-corrosive fluids from drums, barrels, and tanks.

Product Overview

Manual Hand Pull Oil Fluid Transfer Pump

This manually operated oil pump is designed for efficient fluid transfer in industrial and automotive environments. Featuring a reliable hand-pull suction mechanism, it is engineered to handle oils, lubricants, and other non-corrosive fluids directly from drums, barrels, and tanks. Built with durable materials, this tool ensures long-lasting performance and ease of use for professional maintenance tasks.

Key Features

Usage Environments

Industrial • Automotive

Compatible Fluids

Oil, Lubricants, Non-corrosive fluids

Operation

Manual hand-pull suction

Components

Included Components

- Intake tube
- Flexible discharge hose
- Hand-pull mechanism
